## SHARK HAD HAD A FEAST

STOMACH FILLED WITH PIGS AND OTHER THINGS SWALLOWED BY THE MONSTER.

Fish Inspector Berndt succeeded yesterday in skinning the big shark and will soon have it prepared ready for shipment to the fish commission. The shark is not to be sent to the St. Louis Exposition but goes to President Jordan.

When the latter was in Honolulu he expressed a desire that some specimens of large sharks be secured by Captain Berndt and sent to the Coast. Some time ago Captain Berndt secured a fine specimen of the famous tiger shark and sent it to President Jordan. The gray shark which Herb Young caught last Saturday was a splendid specimen, so Captain Berndt secured the monster.

The shark was as fat as an eel. There was good reason for it. When opened the stomach of the shark was found to contain the remains of three big pigs and a large quantity of horse flesh. The body of one of the pigs was intact and had apparently been gulped down by the shark. Judging from the amount of horse flesh inside of the shark, he had swallowed at least a quarter of one of the dead horses. The shark could easily have swallowed a man. The shark was a man-eater but happily no evidence of any such feat was discovered. The creature had seven rows of teeth. His backbone measured two inches in diameter.

COURT NOTES.

The four deserting German sailors from the British bark Clan Buchanan who were arrested on the requisition of British Consul Hoare, were again before Judge Gear yesterday afternoon. After a brief hearing the matter was continued until 4 o'clock this afternoon. Holmes & Stanley appeared for the Consul, who desires to have the men placed on board the vessel. A. H. Crook represented the sailors.

Judge Robinson appointed Edmund H. Hart as temporary administrator of the estate of Kualana (w), deceased, under bond of \$1000. Monday, April 11, was set for hearing the petition of Henry Holo Huihui, nephew, to have Hart appointed as permanent administrator. Mr. Hart immediately qualified on his bond, with J. F. Colburn as surety.

A discontinuance was filed yesterday in the suit of M. F. Scott vs. W. E. Edings.

The second suit brought by the Kapilani Estate vs. C. J. Hutchins, Waterhouse Trust Co. and E. E. Conant has been dismissed by Judge Edings at Kailua because of a flaw in the complaint. The suit was brought to obtain possession of the Kona Sugar Co. lands and particularly the mill-site.

The trespass suit of Mrs. Fanny Love administratrix, vs. Z. C. Copeland and Auditor J. H. Fisher, garnishee, had a third and final hearing, jury waived, before Judge De Bolt yesterday. F. Andrade for plaintiff; G. A. Davis for defendant. The court awarded plaintiff damages of \$1 from which ruling she appealed. The claim was for \$181.50 and costs on account of the shooting of a horse.

MAKING PRECIOUS STONES.

Chips Ruby Turned Into Stones of Commercial Size.

Rudolph Oblatt, a chemist and expert on precious stones, is reported to have invented a process for the fusing of particles of ruby, known as ruby waste, into stones of a commercial size. The stones which he has produced have received considerable attention from local geologists and are pronounced genuine. He selects from the small, rough, genuine ruby particles whose colors and qualities are practically the same. One chip he places upon the top of a U-shaped platinum tube. He then applies the heat, which is concentrated by a special process and forced upon the ruby with an air pressure of 800 pounds. As the chip is melted he adds other chips until he has built up a genuine ruby whose weight varies from five to ten carats. The operation requires from one to two hours.

After the ruby has been produced a difficult task remains—that of cooling of the stone, which is at a tremendous heat. This is accomplished by a scientific process which prevents cracking. The ruby is sent to the precious-stone cutters, where it passes exactly through the same process as a stone from the Burmah mines—New York Commercial.

TOO POPULAR.

A girl in Pennsylvania went to a dance recently while suffering from small-pox and gave it to six of her partners. Now they wish that she had not been so popular.

One of the Triumphs of Modern Surgery.—By applying an antiseptic dressing to wounds, bruises, burns and like injuries before inflammation sets in, they may be healed without maturation and in one-third the time required by the old treatment. This is one of the greatest discoveries and triumphs of modern surgery. Chamberlain's Pain Balm acts on this same principle. It is an antiseptic and when applied to such injuries causes them to heal very quickly. It also allays the pain and soreness. Keep a bottle of Pain Balm in your home and it will save you time and money, not to mention the inconvenience and suffering such injuries entail. ## Why The U. S. Machine Is The Best—BECAUSE

It is the only Rotary Washer that has revolving steel ball gearing, reducing the friction and thus making machine so light running and almost noiseless.

The gear wheel turns right or left, the pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap suds and cleaning them WITHOUT RUBBING THEM TO PIECES.

Over One Hundred Thousand in use.

The U. S. Machine have no equal because they wash clean.
